

MonetaryEconomic One-Page Executive Summary

Date: 2026-02-24 | Scope: Baseline vs Enhanced Track (non-overwriting)

Enhanced best run: run_006_thr0.50_sup2_len3_cov0.30_ml1_mg0.00_sa0.20_bw0.35

Objective:
Keep original deliverables intact while improving match and activation metrics.

What changed in method:

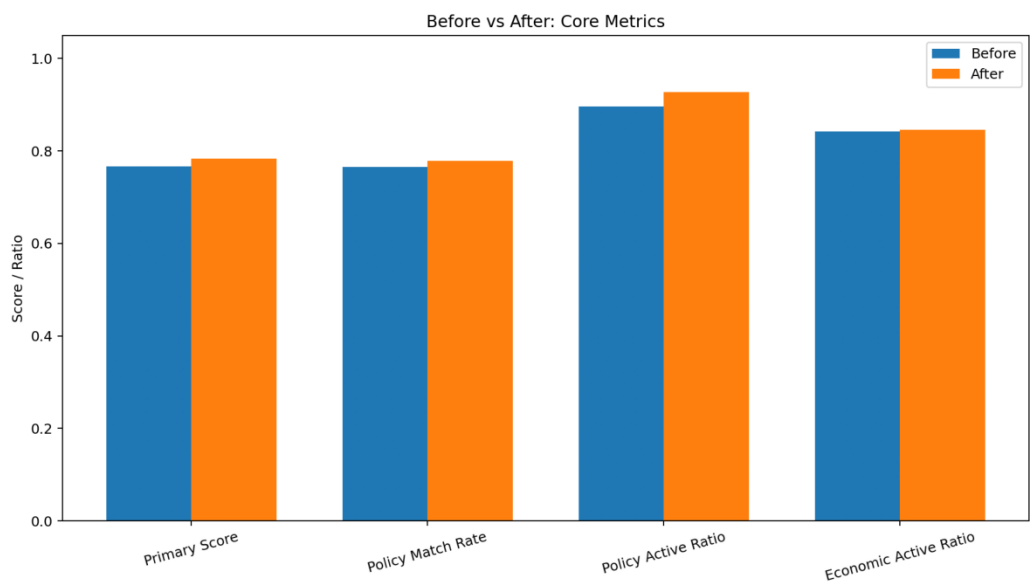

- 1) Dictionary probability smoothing (alpha).
- 2) Optional label-margin filter.
- 3) ML-prior + count-based blended dictionary decision.

Top-1 metric deltas (Before -> After):

- score_primary: 0.766742 -> 0.783494 (+0.016752, 2.18%)
- policy_label_match_rate: 0.764706 -> 0.778281 (+0.013575, 1.78%)
- policy_event_active_ratio: 0.895928 -> 0.927602 (+0.031674, 3.54%)
- econ_event_active_ratio: 0.841629 -> 0.846154 (+0.004525, 0.54%)
- dict_total_size: 1585 -> 1749 (+164, 10.35%)

Interpretation:
Enhanced track improves effectiveness with a larger dictionary footprint.
Baseline outputs remain valid and acceptance script still passes.
